Ditch the Paper. Delight Guests with **Contactless QR Ordering**

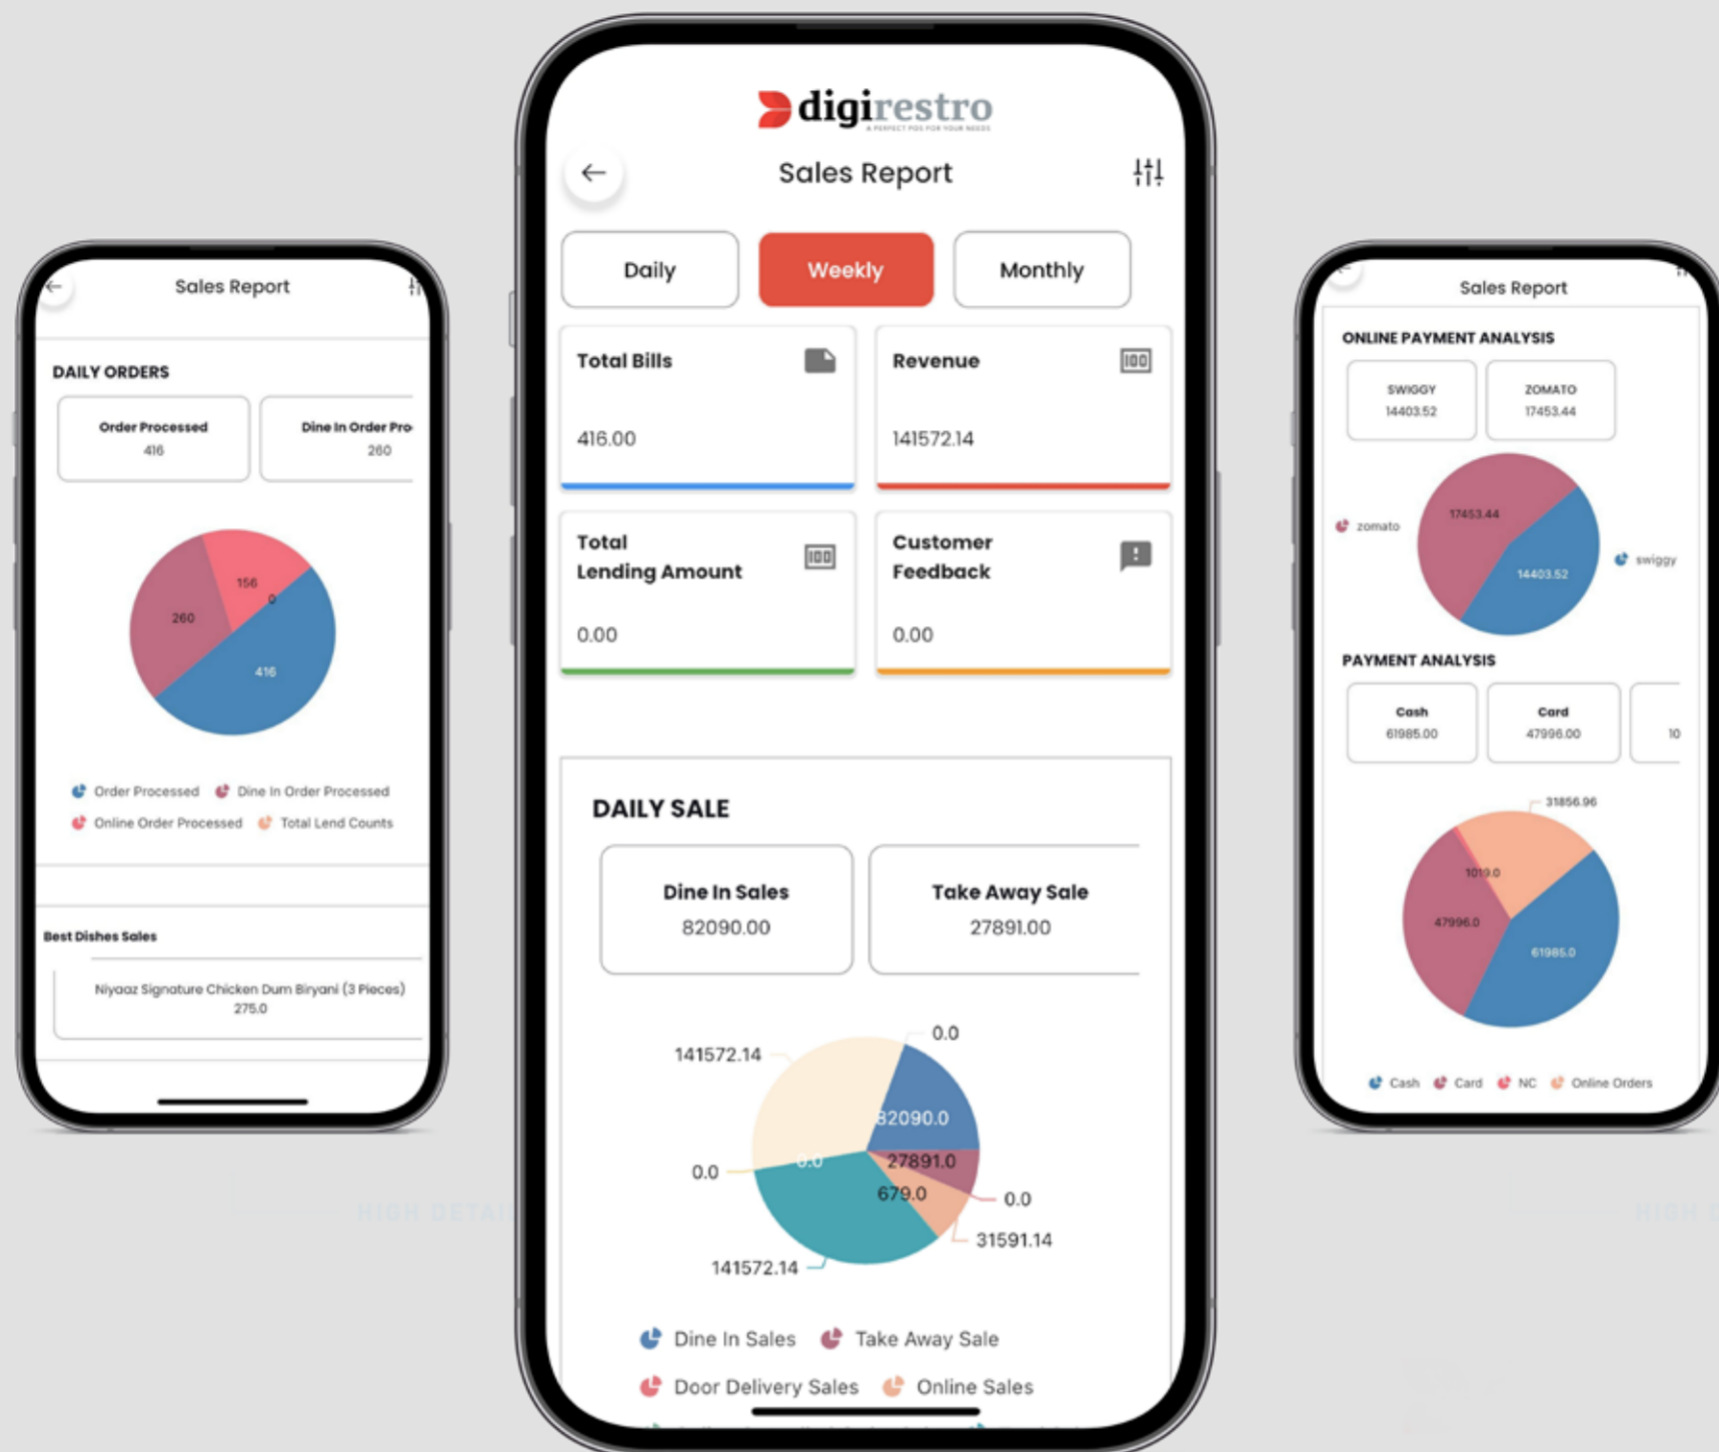

Say goodbye to outdated paper menus and hello to effortless updates, real-time customization, and seamless dynamic pricing.

With Digirestro's **QR Code Ordering Menu**, customers can browse, order, and enjoy — all from their phones.

It's fast, contactless, and beautifully simple.

Real-Time Data for Owners and Business Stakeholders

Track sales, Revenue, and More with Our Web-based Dashboard or Mobile App

Managing one restaurant is challenging — managing many requires visibility, speed, and control.

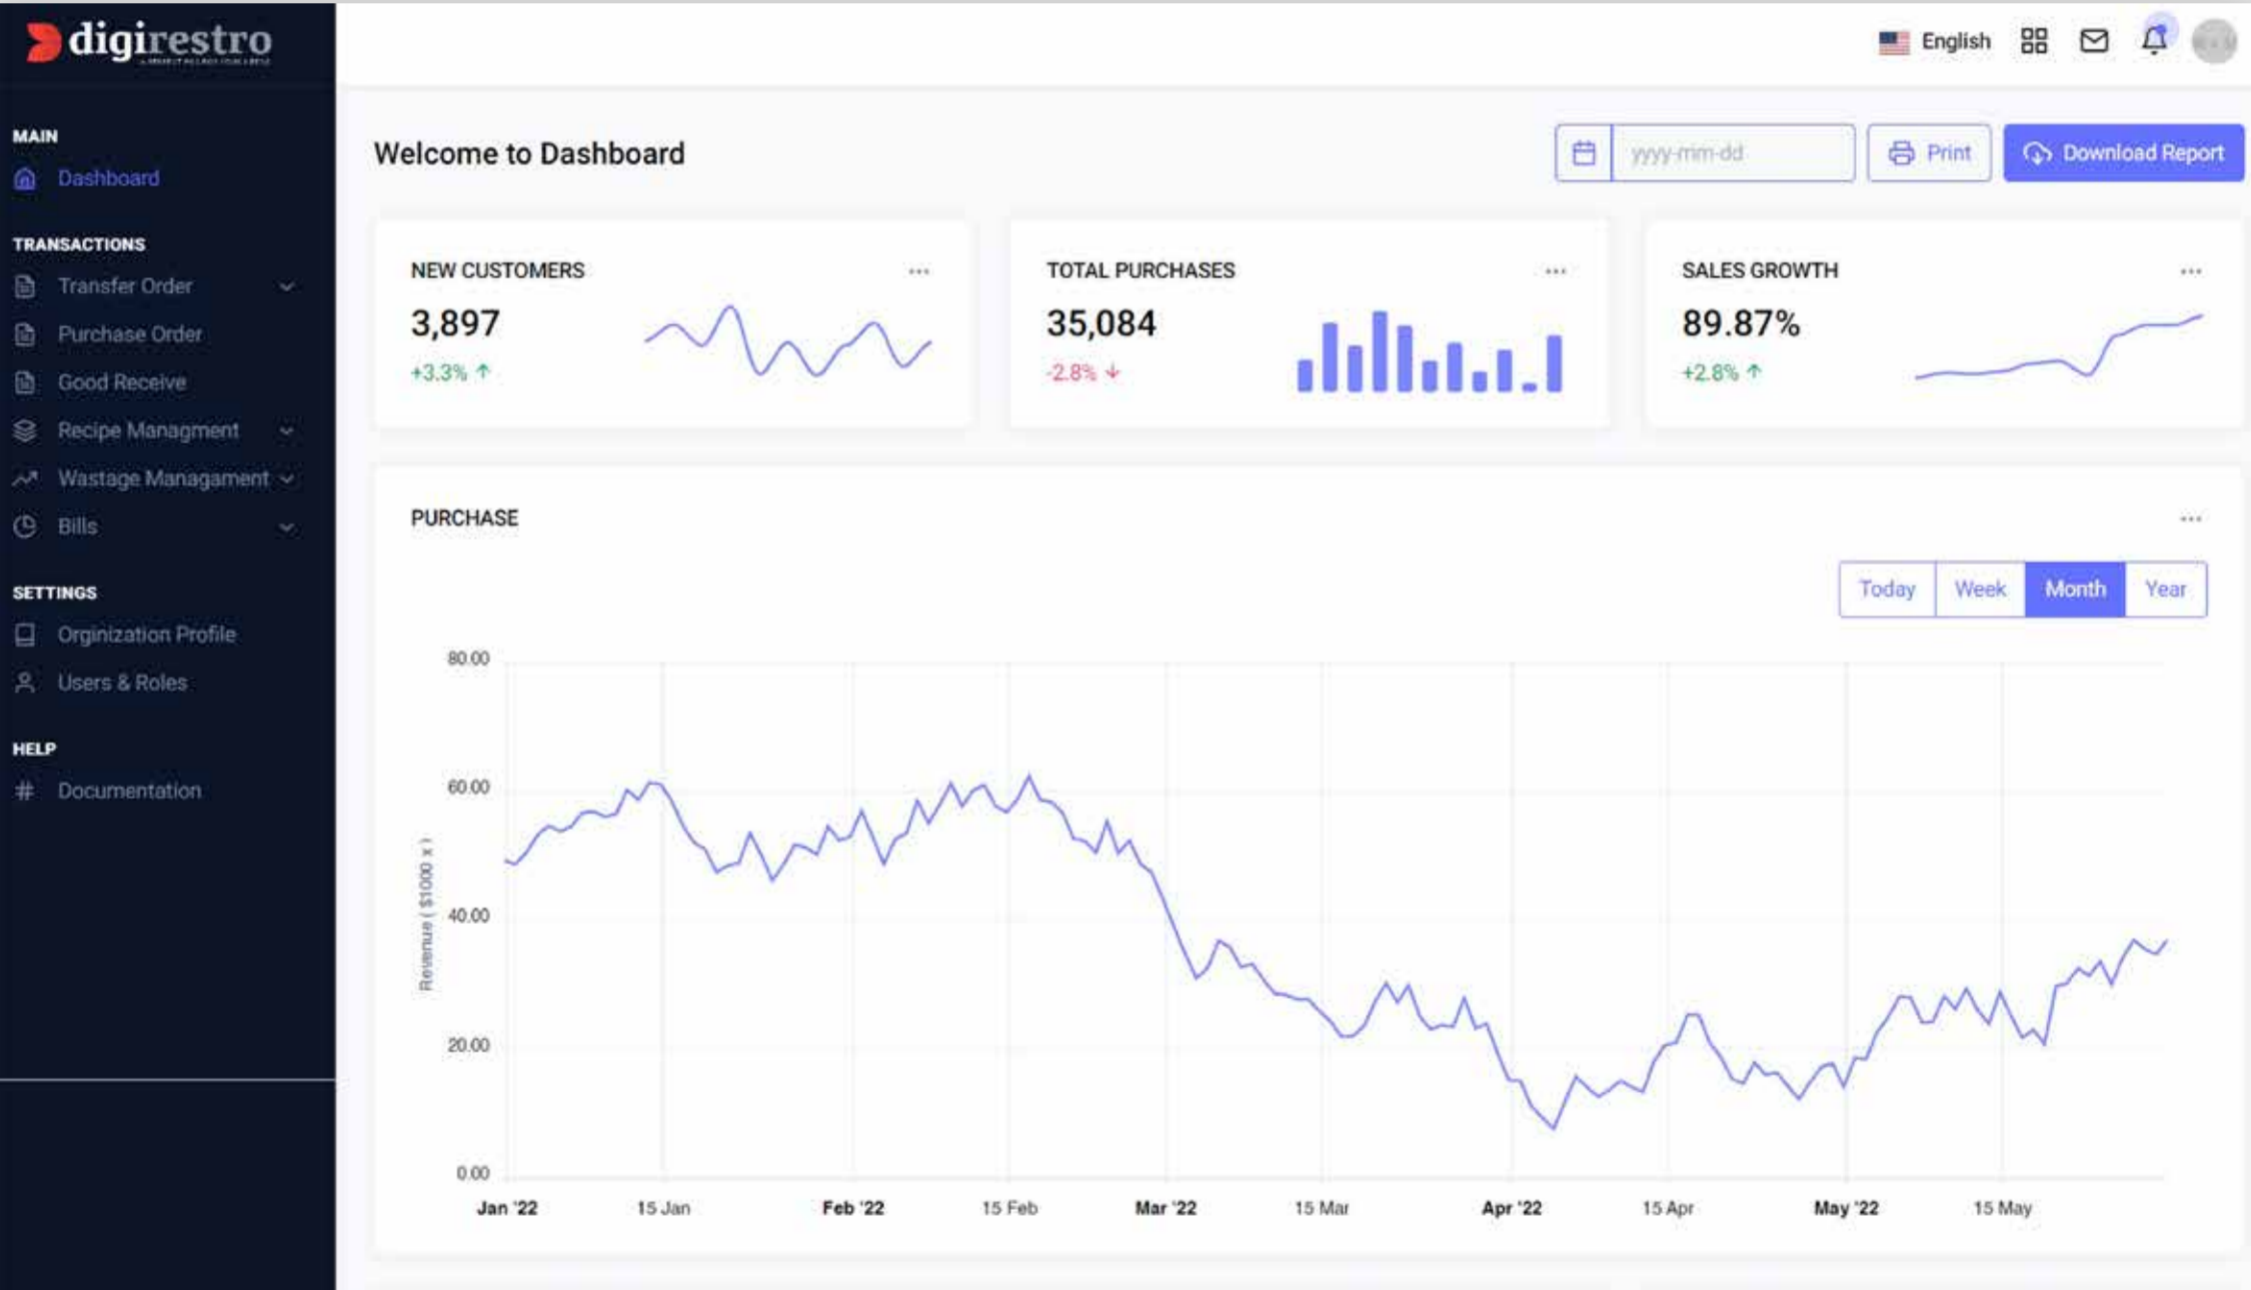

The Digirestro web-based dashboard and mobile app give owners and business stakeholders real-time access to critical data, no matter where they are.

Track sales, revenue, and operational performance across locations, all from a single interface. Monitor inventory levels, compare store performance, and uncover actionable insights that help you reduce costs, improve margins, and scale with confidence.

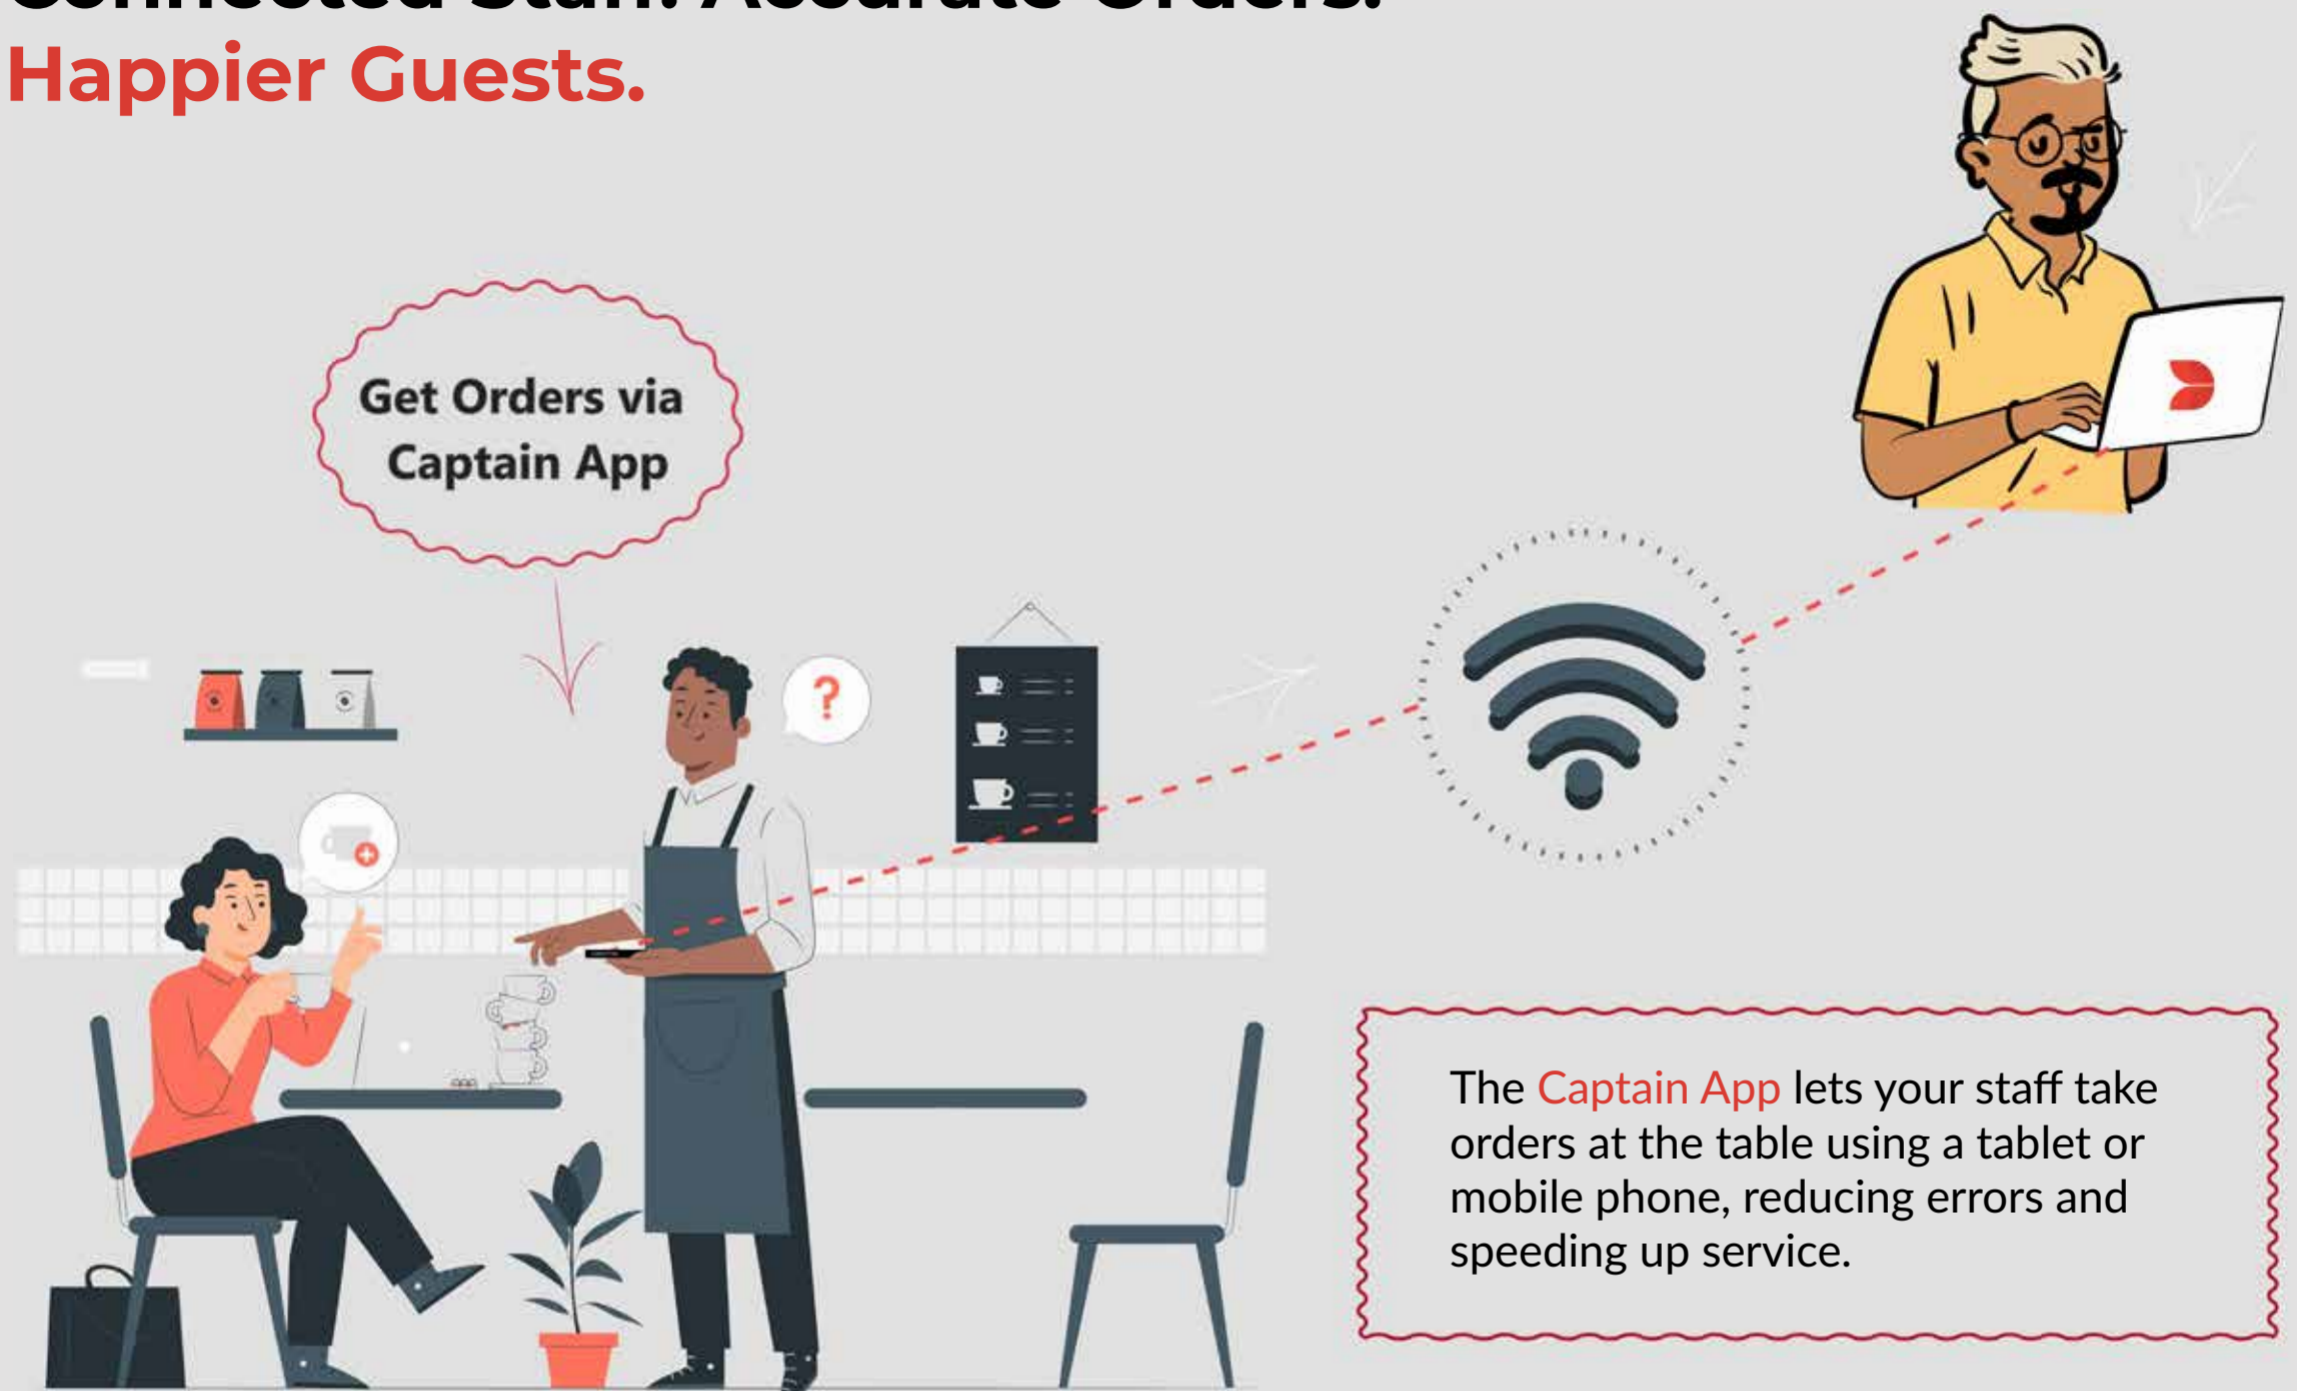

Take the Guesswork Out of Inventory Management

Food costs are one of the biggest variables in a tight-margin industry – and poor inventory control leads directly to waste and lost profits. Digirestro's Inventory Management system helps eliminate that uncertainty. It tracks stock levels in real time, updating automatically with every sale and

supplier delivery. The intuitive dashboard shows what's on hand, what's moving, and what needs attention, so you can avoid both understocking and overordering. Make smarter purchasing decisions, reduce waste, and protect your bottom line without extra effort.

Connected Staff. Accurate Orders. Happier Guests.

Centralized Menu Management

Maintain a single, up-to-date product catalog synced across all in-person and online channels.

Secure, Role-Based Access

Assign staff PINs and control permissions to streamline workflow and protect sensitive data.

Mobile Sales Insights

Track real-time sales from your tablet or phone and adjust to trends with built-in analytics and reporting tools.

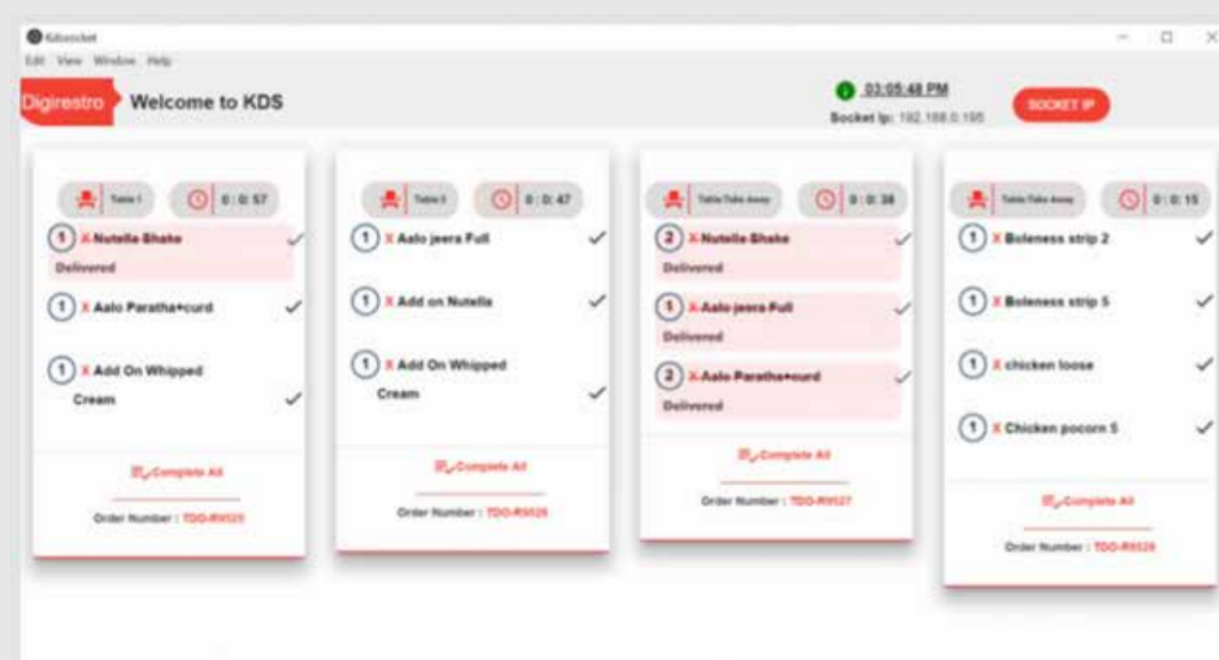

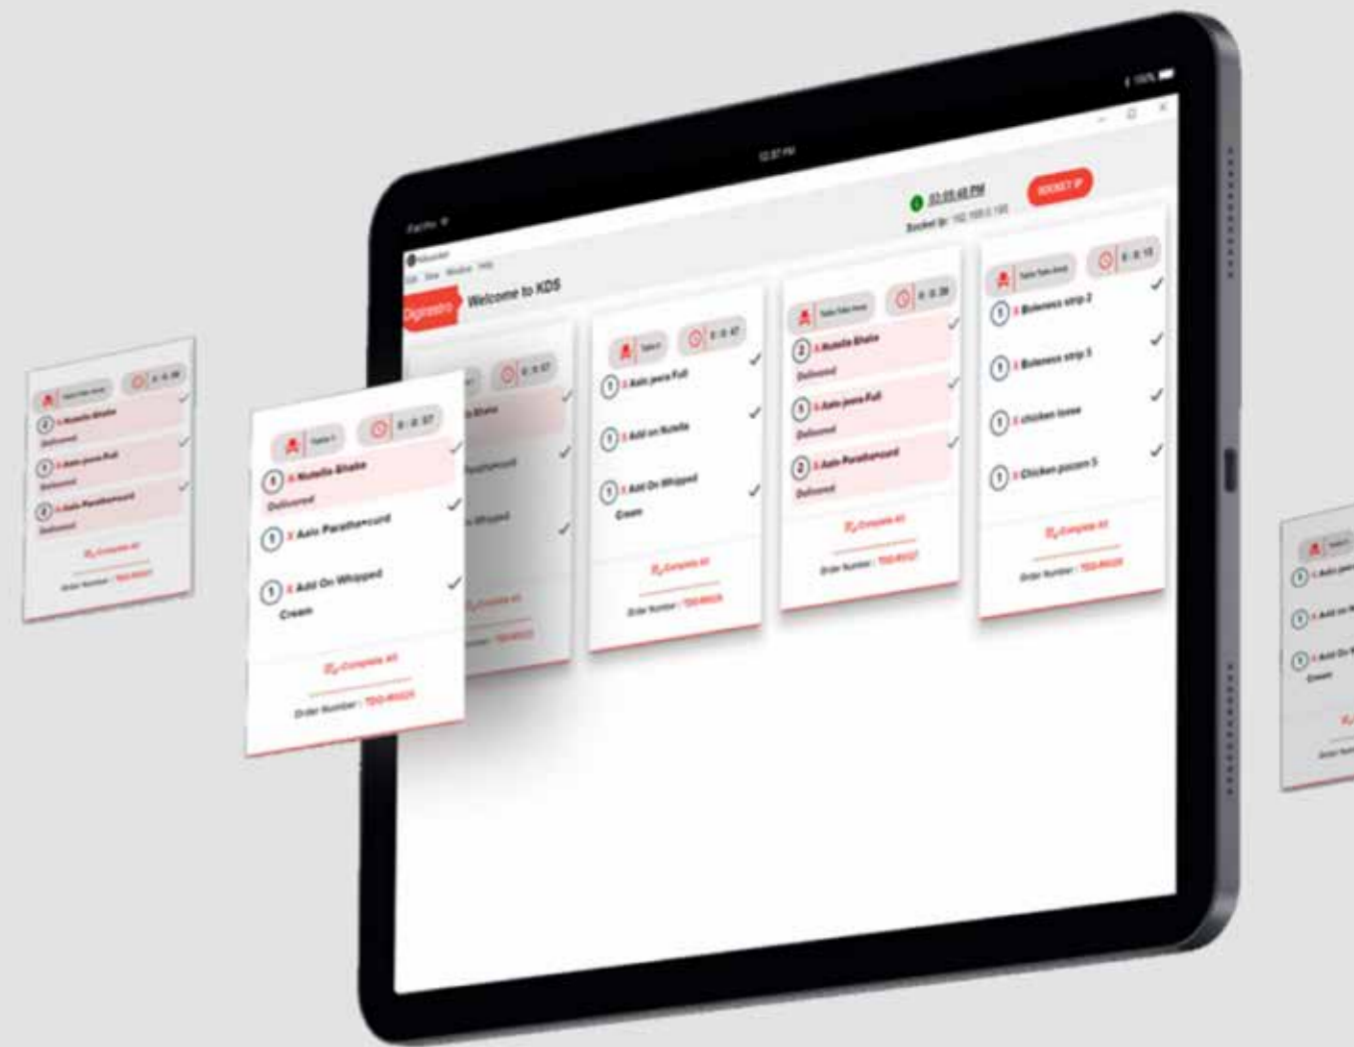

All Your Orders, Organized in One Place.

Stay in control during busy hours with a system designed to streamline order tracking and reduce errors. Digirestro ensures every new order is processed smoothly — no confusion, no delays.

Instant Kitchen Alerts: New orders are sent to the KDS in real time.

KOT Time Tracking: See when each order was placed and how long it's been in progress.

Item-Level Status Updates: Monitor the prep status of every dish for greater accuracy and coordination.

No More Chaos, Online Orders Go Straight to KDS

Handling multiple online ordering platforms shouldn't mean juggling devices. Digirestro's KDS consolidates your delivery orders so your team can manage them efficiently and in real time.

Direct-to-Kitchen Integration: Third-party orders land instantly on your KDS.

Set Status from the Kitchen: Update order progress without switching systems.

Adjust Prep Times On the Fly: Manage kitchen load and timing with complete flexibility.

Your Brand. Your App. From Your Kitchen to Their Dining Table.

Launch your own fully branded mobile ordering app and take control of the customer experience from start to finish. With Digirestro, you can bypass third-party platforms, reduce commission fees, and create a direct digital connection with your customers.

Build a Unique Digital Presence

Elevate your restaurant's presence with a branded app instead of relying on third-party platforms.

Own the Customer Relationship

Engage users directly and boost loyalty with personalized experiences.

Go Direct-to-Consumer

Skip the middleman and drive more profitable orders.

Avoid Commission Fees

Keep more of your revenue by eliminating third-party charges.

Integrated Payments

Seamlessly connect to your preferred payment gateways.

Delivery Partner Integration

Easily connect with partner companies to fulfill orders efficiently.
