# Ordering Challenges

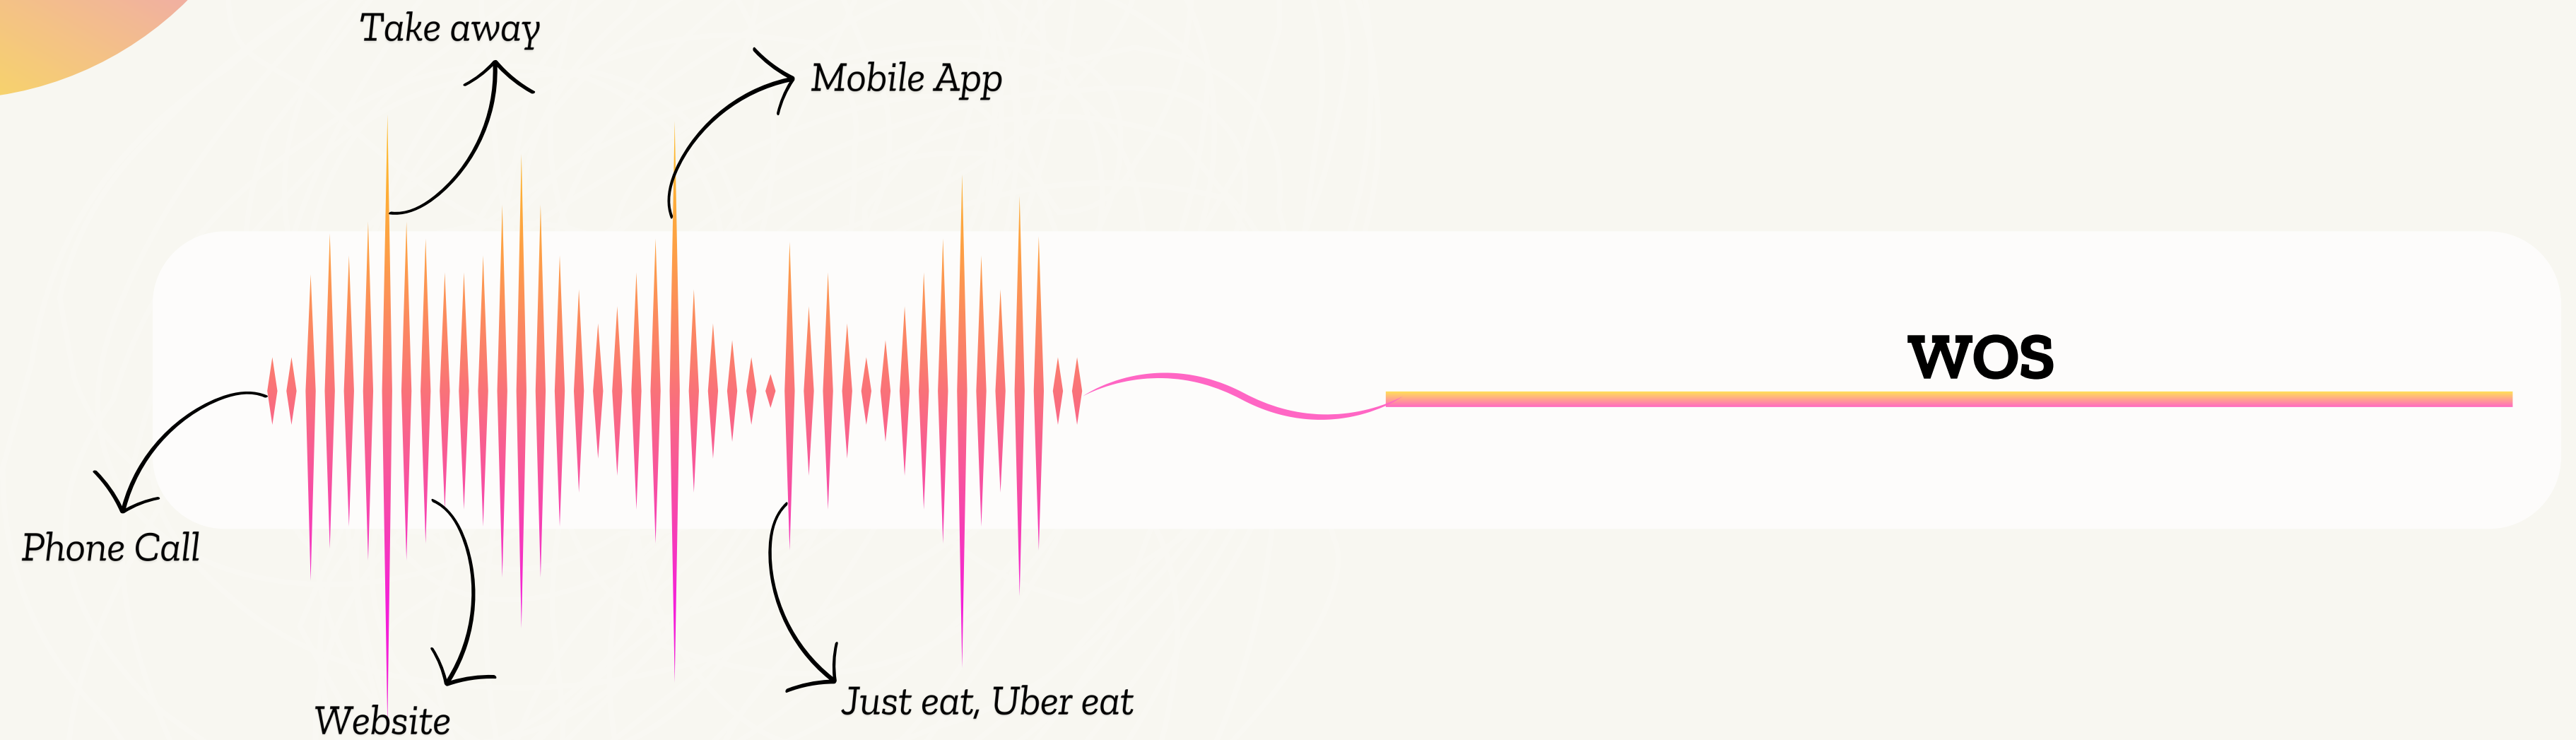

- ✦ Do you know 30% of business comes from regular/repeated customer for order?
- ✦ Phone Order taking systems are expensive and difficult to keep under control
- ✦ Ordering through SMS/ Conversational based WhatsApp order will take almost equivalent effort as phone ordering system.
- ✦ Buyers avoid downloading App's as frequency of ordering can be less
- ✦ Aggregators has more control on whose shop items to be displayed which influences buyers buying pattern.

WE ARE HAPPY TO LAUNCH  
WHATSAPP ORDERING SYSTEM  
WHICH CAN ADDRESS THE ABOVE CHALLENGES

# Chaos to streamline

# Chaos?

# Others

**Phone call:** Maintaining consistent availability and tone requires significant effort and can be incredibly challenging.

---

**Website:** Developing a website demands considerable time, resources for design and development, funding, and requires ongoing branding and continuous updates.

---

**Mobile App:** Promoting app downloads requires continuous investment in app store fees and necessitates providing frequent updates to maintain user engagement.

---

**Just eat, Uber Eat:** Food aggregators impose commissions, creating a barrier between you and your customers, and potentially limiting your direct engagement.

# WOS

Our 'WOS' Eliminates 'Others' and serves what your business Deserves

# Why you should Consider WOS

Why hire when our conversational bot works 24/7 and maintains its tone?

Do you need a website when you can achieve conversions without one? It saves time, funds, and effort. Think about it...

I can't assure you that everyone will download your app, but WhatsApp, I'm fully on it.

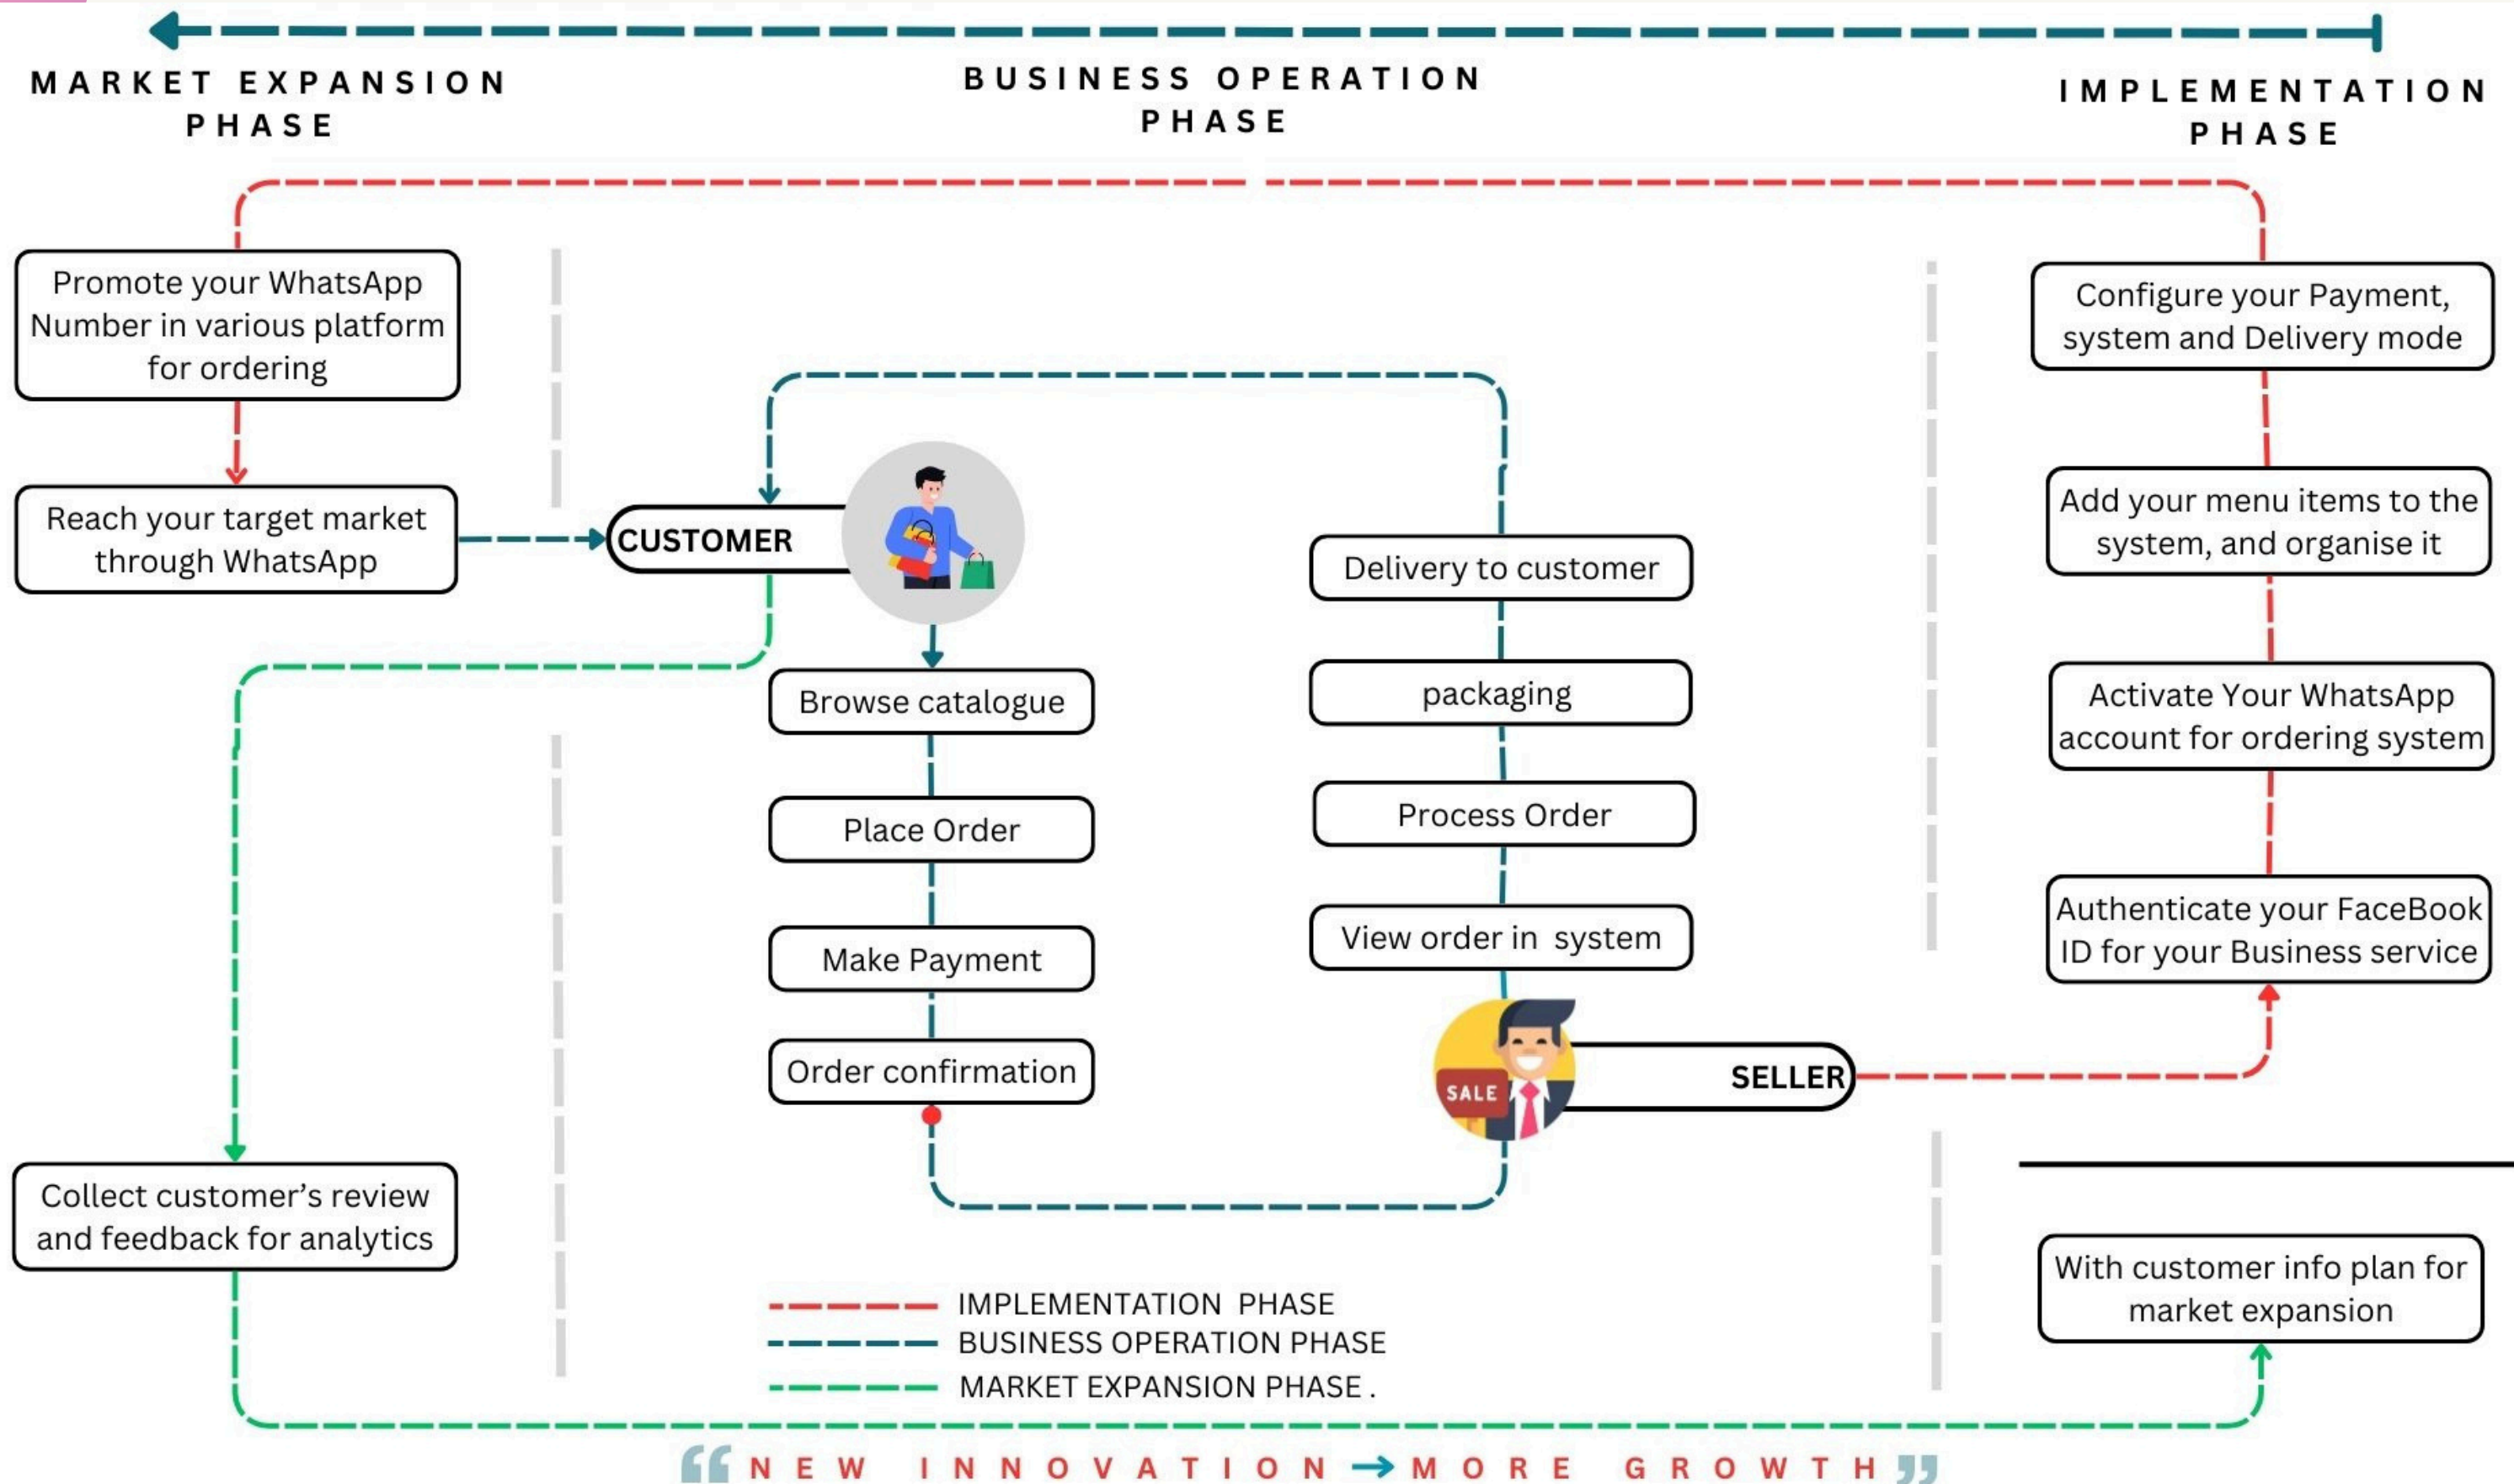

Your product, your sales, your profit, your customer base... Through our WOS.

In India A food aggregator charges ₹140 on total order value of ₹400, meanwhile ours is just ₹12-Fixed, (order value doesn't matter).
